About the Journal

AIMS AND SCOPE

Collective Intelligence Perspectives is a global, open-access journal offering a transdisciplinary platform for systemic perspectives on collective phenomena related to information, communication, and control—within and between human actors, organizations, technologies, and environments.

Our aim is to enrich the repertoire of mindsets, concepts, perspectives, and distinctions shaping how we understand and engage with Collective Intelligence.

The journal is governed on a not-for-profit basis by the Society for Managerial and Social Cybernetics (GWS Society).

We publish scholarly essays, opinion pieces, and exchanges in both textual and multimedia formats.

We welcome your engagement—please reach out at *office@ci-perspectives.org*.
